## Key Vocabulary

<b>Hemisphere</b>	A half of the earth, usually divided by the equator into the northern and southern hemisphere.
<b>Co-ordinates</b>	A set of numbers and/or letters that show you a specific position on a map.
<b>Atlas</b>	A collection of maps often of each country in the world.
<b>Compass</b>	A tool used for showing direction.
<b>Latitude</b>	Latitude lines run around the earth east to west. These lines are the same distance apart from each other.
<b>Longitude</b>	Longitude lines run over the top of the earth north to south. These lines are not equally distant from each other.

northern hemisphere

equator

southern hemisphere

### The Tropics

- The Tropic of Cancer (northern tropic) and the Tropic of Capricorn (southern tropic) mark the most northerly and southerly positions that the sun can be overhead.
- Between the tropics the weather is hot all year round.
- Rainfall can vary here. In some places, there is very little rain, some areas have a rainy season and some places have lots of rain all year round.

### Sky Objectives:

1. Locate, describe and understand climate zones, rivers, mountains and the water cycle.
2. Describe and understand sustainable activities, such as saving water, and the impact these have on the environment.
3. -identify the position and significance of the Tropics of Cancer and Capricorn.
