

Objectives and Sticky Knowledge – Webpage Creation

Previous Knowledge Recap:

1. I know that permission is needed when recording another person.
2. I know that videos of other people must not be shared anywhere without the person’s consent, or consent of an adult.

Land Objectives and Sticky Knowledge:

Select and create a range of media including text, images, sounds and video.

Understand how relationships and behaviours may lead to harm and how positive online interaction can empower and amplify voice.

- I can recognise the common features of a web page
- I can suggest media to include on my page
- I can draw a web page layout that suits my purpose.
- I can add content to my own web page
- I can preview what my web page looks like
- I can evaluate what my web page looks like on different devices and suggest/make edits.
- I can describe why navigation paths are useful
- I can make multiple web pages and link them using hyperlinks
- I can create hyperlinks to link to other people's work
- I can evaluate the user experience of a website

I understand that I must not say anything online that may cause upset or offence.
 Know that one something is online, there is a formal record of it.
 When people work together, awareness of issues can be created quickly and change can be made.

Key Vocabulary

Websites can be made up of lots of different web pages.

The pages are related and together they make a website.

Copyright

If you want to use someone else's work you should:

- Ask permission
- Give credit to the person who made it
- Buy it – if it has a cost attached (e.g. from an online resource library)

Copyright

It is easy to copy, change, or download content from the internet.

Copyright law protects the control you have over the things that you create. It also protects the work of others.

A website's design usually starts at the top with the home page.

Then we create branches that lead from that web page to another. These are called subpages.

Sky Objectives:

Use variables in programs in order to influence a value.

Collect, present and evaluate data that is easily understandable to a given audience.

Demonstrate the safe and respectful use of a broad range of technologies grounded in the understanding of the importance of privacy, consent and respect.
